All Units can be available with ball-bearing slides for longer drawer life and increased capacity!

TC tool chests and mobile cabinets' units are made from first grade steel, with good welding characteristics for added strength. The main working edges are properly folded to prevent injury to users and to add product rigidity. Optional Key locks for additional user security covered with stainless steel for increased protection are also available. TC products' Powder Coating characteristics include; non-toxin, good adherence, resistant to humidity & UV.

M3B can be combined with the work-table which increases storage space considerably.

M3B
