

TC tool mobile cabinets' units are made from first grade steel, with good welding characteristics for added strength. The main working edges are properly folded to prevent injury to users and to add product rigidity. Optional Key locks for additional user security covered with stainless steel for increased protection are also available. TC products' Powder Coating characteristics include; non-toxin, good adherence, resistant to humidity & UV. All of TC's Tool Mobile Cabinets are available with ball-bearing slides for longer drawer life and increased capacity!

# Mobile Cabinets

## BALL BEARING SLIDES

**supports weights to 70 kgs per drawer for mobile cabinets**

The BB-Slides for mobile cabinets are upgraded with ranking 70kgs loading capacity per drawer. When a drawer is opened, the mid-section of BB-Slides comes first, and both frames are grinded to double layer. Built with high grade balls. These features conduct great strength & loading.

## LOCK HANDLE

For the sake of security and convenience, the lock handle function prevents drawers from opening when moving the cabinet about. This safety device enables workers to travel around without the risk of accidental draw opening which could lead to serious injuries and/or damage.

## No More Injuries!

With TC's **One At A Time Draw Opening System**

TC has developed a multiple draw system tool storage box that limits the risk of hand injuries caused by accidental draw opening. This system, which allows only one drawer at a time to be opened, adds an important safety element to any working environment. Injuries usually occur during relocation and transport of cabinets and tool boxes, when drawers accidentally slide open. Injuries may also occur when the user pinches his fingers between 2 drawers. This patented device, which has received praise from many international branded tool companies, will soon become an industry standard.

# ACCESSORIES FOR MOBILE CABINETS

## BH1

### SIDE HANDLE

Cabinets are often moved from one location to another. It is with the customer in mind, that TC has added side handles. The handles come in handy when pushing the trolley or cabinet from one area to another whilst limiting injuries through mishandling. Side handles are optional.

## BH2

### SIDE TRAY

The added side tray is a useful feature for those who need extra working space for storing tools, drink containers and accessories during or between work applications. Side trays are optional.

## BPH2

### SIDE TRAY with PAPER ROLL SUPPORT

The extra side tray can also double as a paper roll support which is ideal for oily applications.

## BH3

### UPWARDS HANDLE

The upward handle design is ideal for taller people, and makes it more comfortable & easy to move the cabinet around, especially for 966mm H cabinets.

## BS1

### SIDE SHELF FEATURE

Expands usable work surface by over 288 square inches. Folds down to limit storage space wastage. Suitable for all TC mobile cabinets.

	WIDTH	DEEP
OVERALL	18 in 457 mm	16 in 406 mm

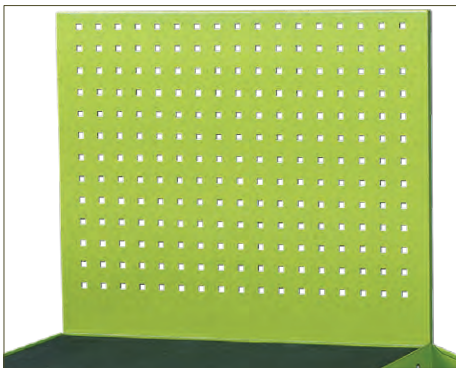

## BDP PARTITION UNITS

2 pcs long & 3 pcs short partitions create 12 standard spaces for small parts. Drawer partition sizes can be adjusted based on customer's requirement.

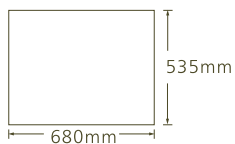

## BPRN DRAWER PARTITION

Aluminum drawer partitions with stainless steel clips provide efficient storage options when separating accessories. Sizes can be altered based on customer's demands.

## BBP BACK PANEL

The back pegboard panels are ideal supports to host a great number of tools. Perfect for hanging tools and accessories, each panel can come with customized rounded or square holes for different hanging needs. Every panel fits each and every TC cabinets.

## BWTP ABS MULTI-PURPOSE WORK TOPS

Always at the forefront of innovative designs to increase work environment efficiency, TC offers hard ABS multi-purpose work tops. Designed to provide additional work and storage space, this work top accommodates loose screws, nails, bolts, tools, bits and the like. Small trays limit risks of tools and bits rolling off the work surface. Additional detachable side trays may be added either side. Furthermore, this work top also protects the cabinet from inevitable scratches, stains and markings.
