4 DRAWERS' HEAVY LOAD TOOL CABINET

CNC machine tool cabinets are designed for safe storage of tools and tooling. Each drawer offers various conveniences, from compartmented storage spaces for small parts, tools and accessories to rubber cushioned trays that protect the tools. The top drawer is a standard tray that comes with optional accessories (such as HDP, HBP) for different applications and storage requirements. The 2nd to 4th drawer are tool-holder drawers with customized tool hole sizes for storing tools safely and conveniently.

This heavy load tool cabinet can support weights of up to 200kg per drawer. Each drawer supports full opening on 3 section bearing slides.

This cabinet comes with a stand base and a kicking plate. Optional 'height adjustable leg base' instead of 'stand base and kicking plate'.
